EDUCATION

Bachelor of Technology, Computer Science and Engineering | Bennett University

Aug 2023 – May 2027

CGPA: 8.7/10

SKILLS

Product: PRD writing, feature scoping, Agile, competitive Analysis, user flows, design reviews, stakeholder management

Analytics & Research: PostHog, Mixpanel, SQL, Excel, Google Sheets

Technical: LLMs, RAG, AI Agents, NLP, Generative AI, Machine Learning, Python, SQL, TensorFlow/Keras

Tools: Jira, Notion, Supabase, Vercel, GitHub

WORK EXPERIENCE

Product Intern | Kreeya (B2B SaaS Design Studio)

May 2025 - Aug 2025

- Owned the PRD for 2 core features of **GoKlaim**, a claims reimbursement platform, taking them from problem definition to shipped interface and driving 20% faster claim processing over 4 weeks.
- Supported product discovery for **IQLine**, a multi-module healthcare platform (LIMS- Laboratory Information Management System) for pathology labs, reducing the patient intake time from 8 min to 5 min (38% reduction) during usability testing.
- Scoped and prioritized features by running competitive research across 10+ AI-native SaaS products.
- Worked closely with senior designers, engineers and the founder on problem framing, user flows, design reviews and scope decisions, helping focus development on core user workflows and reduce avoidable rework.

Founders office Intern - Product | ScrapUncle

July 2026 – Present

- Conducted a CRO audit and identified key onboarding improvements, including prominent WhatsApp support, calling assistance and minimum scrap value visibility, simplifying the customer journey.
- Designed an OTP-based pickup verification workflow for 250–300 daily pickups, enabling customers to verify item-wise weights before completion and reducing payment-related complaints by approximately 40%.
- Defined product requirements and workflows for a picker application to improve operational transparency and prevent item and weight discrepancies during pickups.
- Redesigned WhatsApp bot journeys and customer support message templates, automating common support interactions and reducing manual workload for the customer support team.

PROJECTS

AI Resume Analyzer | Solo

April 2026

- Built an AI tool that scores resume to JD fit and returns actionable feedback, helping candidates self-evaluate before applying; tested with approx. 40 users to validate scoring accuracy and feedback quality.
- Architecture: PDF parsing, Sentence Transformers for semantic similarity, Gemini for feedback generation and a RAG-based QA layer for follow-up questions.

BUFC - Bennett University Food Courtyard | Team Project

Dec 2025 – Feb 2026

- Defined and prioritized core features (menu browsing, order placement, real-time tracking) from 3 rounds of user research, shipping a full-stack ordering application that reduced average wait time by 50%.
- Tech stack: React, TypeScript, Supabase, deployed on Vercel.
