PROFESSIONAL SUMMARY

Early-career Product professional with hands-on internship experience across product, analytics, and data roles, combined with independent 0-to-1 product-building. AI-fluent — building AI-powered features, automations, and prompt workflows, then evaluating and improving their outputs directly. Top strengths: product discovery through user interviews and competitive research; experimentation and metrics-driven decision-making; execution-oriented, shipping fixes and features rather than just identifying problems.

WORK EXPERIENCE

Associate Product Manager (Intern) | Solo Mode Studio

June 2026 - Present

- Conducted user interviews and audited multi-app portfolio features and usability gaps, translating qualitative insights into prioritized, stakeholder-aligned product recommendations.
- Ran experimentation on Google Play listings (keyword and metadata variants), measuring install-conversion impact to decide what to ship next.
- Authored high-converting Play Store creative assets, owning the top-of-funnel conversion strategy end-to-end.
- Tracked product analytics using SQL and Firebase Analytics to evaluate funnels, activation rates, feature adoption, and Day-7 retention cohorts.
- Own Habit Alarm, a habit-tracking app for Students, Working Professionals, and Fitness Enthusiasts — conceived, built, and shipped it on Google Play; wrote PRDs and ran competitive teardowns of 5 rival apps to identify differentiation opportunities.
- Built n8n-based AI automation workflows to reduce manual content and reporting work, prompting and debugging outputs for accuracy.

Data Analyst Intern | Micro Integrated Solutions

Feb - May 2025

- Analyzed 500+ sales and service records using Excel and SQL, forming hypotheses on demand trends and validating them through ETL, data cleaning, and ad hoc analysis.
- Built interactive Power BI dashboards to track revenue, customer segments, and service KPIs while supporting UAT.
- Improved data accuracy by 25% through rigorous QA/QC validation, strengthening the reliability of business-critical reporting.
- Identified that commercial clients generated 60% of revenue and AMC customers had 30% fewer complaints — signal that directly informed cross-functional process improvements.

PROJECTS

WalletMind: AI Expense Tracker | Founder · Product Discovery · AI Integration

2026 - Present

- Founded and independently led an end-to-end personal finance app from user research and problem definition through build, launch, and iteration — a true 0-to-1 initiative with no playbook.
- Shipped “AI Guru,” an AI-powered financial advisor (Gemini API) that analyzes real-time spending patterns and generates personalized user insights, including prompt design and output evaluation.
- Defined a freemium monetization model based on user research, packaging core tracking for free users and gating personalized AI advisory behind a premium tier.
- Owned the complete product lifecycle — discovery, UX, build, and GTM prep — ahead of Google Play Store launch.

SKILLS & TOOLS

Product & Discovery: User Interviews, Product Discovery, PRD Writing, User Story Writing, Feature Prioritisation, Experimentation & Hypothesis Testing, A/B Testing, Backlog Management

Product Analytics: Funnels & Cohort Analysis, Product Metrics Tracking, Mixpanel (familiar), Amplitude (familiar), Firebase Analytics, Google Play Console

AI & Automation: Gemini API Integration, Prompt Engineering & Debugging, n8n Workflow Automation, ChatGPT / Claude (AI-native PM workflows), Google AI Studio

Data & Analytics: SQL (MySQL, PostgreSQL - CTEs, Window Functions, Joins), Excel (VLOOKUP, Pivot Tables, Macros)

Product Tools: Figma (wireframing, designing), Notion (PRDs & portfolio)

Technical: Android Dev (Kotlin + XML - shipped to Play Store), REST APIs (conceptual), GitHub, ETL, QA/QC

COURSES & CERTIFICATIONS

- Product Management A-Z - Udemy, Evan Kimbrell
- Meta Ads Course - Marketian.io [In Progress]
- SQL for Data Analysis and Business Insights (Dec 2025)
- JP Morgan MS Excel - Forage (Sep 2023)

EDUCATION

BTech (ECE) - Dr. Akhilesh Das Gupta Institute of Professional Studies, Delhi | 2020 – 2024
