- **Soft Skills:** Ownership, Communication, Problem Solving, Collaboration, Adaptability
- **Technical Skills:** Basics of Programming, Sql, Mixpanel, Figma, MS Office, Google Sheets, Canva, Generative AI Tools

## WORK EXPERIENCE

### Founder's Office Intern (Growth Hacker)

Sulopa Technologies | April 2026 – Present

- Managed the **sales pipeline** for HirePool, an AI-powered recruitment platform, by identifying and engaging prospective clients.
- Conducted **customer discovery conversations** to understand hiring challenges and gather insights on user needs.
- Built and maintained **client relationships** while supporting onboarding and product adoption initiatives.
- Collaborated with internal teams to communicate customer feedback and contribute to product improvement discussions.
- Tracked **sales funnel** performance, **customer interactions**, and growth metrics to support data-driven decision-making.

### Founder's Office Intern (Product & Strategy)

Oopar Club | Bangalore (In-person) April 2025 – September 2025

- Conducted **100+ user interviews** to identify key pain points and behavioral patterns, contributing to a **15% increase in user engagement**.
- Owned the **Chatrooms** feature end-to-end, from problem discovery to launch, driving **higher active community participation**.
- Improved the **Challenges feature** through user feedback and iteration, strengthening user engagement and retention.
- Analyzed **user journeys** and enhanced the **event booking and discovery flow**, helping reduce friction and drop-offs during event exploration.
- Performed **market and competitor research** to identify gaps and opportunities, supporting founders in informed product and roadmap decisions.
- Worked closely with design, engineering, and marketing teams to translate user insights into actionable requirements and deliver product improvements efficiently.
- Supported founders in product prioritization and strategic discussions, contributing user-backed insights to shape short-term roadmap initiatives.
- Leveraged Generative AI tools to support research, ideation, and content workflows, improving speed and quality of execution.

### Product & Operations Intern

Algolmpel | (Remote) February 2024 – April 2024

- Conducted competitor research & market analysis to support product planning.
- Created detailed **user personas** based on audience research, guiding product team decisions.
- Helped design and structure the website's admin panel with the development team.
